YOU CAN MAKE A DIFFERENCE IN THEIR LIVES

With a **Mobile Spaza Kitchen**

A self-contained unit that includes a fully functioning gas stove

Drive around any town in South Africa and you'll see them set up on the side of the road: hardworking men and women, selling their daily wares.

Everything from potatoes and bananas to packets of crisps and bottles of Coca-cola lie spread out on plastic crates or pieces of cardboard and carpet.

But the work doesn't begin here, it starts much earlier in the day with long walks and taxi rides, bargaining and decisions - the process of purchasing these essential items for sale.

These resilient entrepreneurs are the reason we developed the MobileSpazaKitchen, a self-contained unit that includes a fully functioning gas stove.

With the use of the MobileSpazaKitchen, tiring walks and expensive taxi rides are replaced with a convenient cycle to their location of choice and favourable spots such as schools, taxi ranks or building sites.

For as little as \$1000.00 or R15 000.00 we supply these entrepreneurs with a fully packed unit to help provide a boost to their small businesses and allow the opportunity for a stronger start in life.

To support you as the sponsor we have 5sqm of brand - ready advertising space on each MobileSpazaKitchen.
